

Groenlo, 9 October 2020

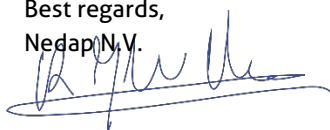

Subject: KDB 353028 Attestation clause II. A 2) c) Professional Installation GDSMARTDEACT.

To Whom it may concern,

The Smart Deactivator model SMART DEACT, FCC ID: CGDSMARTDEACT is an Electronic Article Surveillance (EAS) system intended to be used in stores at check-out counters for deactivating 8.2MHz anti-theft alarm tags.

- This device must be professionally installed.
- The following antenna models can be installed/connected to the Smart Deactivator.
 1. SDA-265x265
 2. DAPL 275x275
 3. MG9800I
 4. NCR7878-5000
 5. HN24-000002
- The Smart Deactivator is a part in a complex and to be integrated in an electronic article surveillance system together with the iDCloud software system to fully customize for each individual store.
Therefor a education and training is necessary for the installers.
Hence also this kind of equipment is only to be sold through professional channels and is not available to the general public.
A Smart Deactivator is intended for the deactivation of anti-theft tags. It is of the utmost importance that is equipment is not available to any person who could than deactivate tags in a store at will and leave the store with products without setting of a theft alarm.
- Installers will need to get an education on Nedap EAS equipment at Nedap HQ and receive a license to ensure correct installation. For additional (secured in depth) information an installer will get log credentials on the Nedap portal when a license is issued.

Best regards,
Nedap N.V.
