Re: Bluetooth Processing Gain

Dear Mr. Jatlow,

This letter is in response to your e-mail dated June 7, 1999. Based on the various submissions pertaining to the Bluetooth system which I have reviewed, the methodology employed to demonstrate compliance with the processing gain requirements of Section 15.247(e) appears to be acceptable.

I hope this has been responsive to your request. Please contact me with any additional questions.

Sincerely,

Gregory M. Czumak
Electronics Engineer
Equipment Authorization Branch
