Re: Attestation Statement concerning Tuning
FCC ID: **CICPCV-A1**

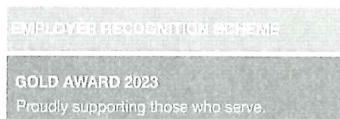

This equipment meets the requirements of the FCC Rules Part 2.1033(c)(9) as applicable.

Frequency control is digital so no tune up is required. The power supply tune up is a proprietary manual process carried out during the manufacturing process. The limits of which define the power range and are:

- Maximum transmit power level = 48.5 dBm +/- 1.5 dBm (power range of 50W to 100W)
- Minimum transmit power level = 40.5 dBm +/- 1.5 dBm (power range of 8W to 16W)

Sincerely,

Timothy Acland
Chief Technology Officer

HENSOLDT UK, a trading name of
