**731 Confirmation No.: EA102623**  
**Correspondence Reference No.: 21364**  
**Request for Tech. Info.: 11/27/01**

Dear Joe :

Transmitted herewith, on behalf of **Toshiba Corporation** is an amendment provided in response to the request for technical information dated November 27, 2001.

1. Please find attached the revised tune-up procedure and operational description.
2. We used a value of 1.62 S/m which has a higher conductivity than the 1.40 value of the new standard. The value is on the side of caution and will lead to a higher SAR value. We will use the new PCS brain recipe as soon ventilation system is installed.

We trust this information is sufficient for the immediate grant of this application. If you have any further questions, please do not hesitate to contact us.
