

## Operational Description

This device is a Tablet PC, which operates in 2.4GHz band for both WLAN and Bluetooth functions; the maximum data rate could be up to 150Mbps which OFDM technique. If the signal to noise radio is too poor which could not support 150Mbps, the 11Mbps data rate with DSSS technique will be applied.

The transmitter of the EUT is powered by the 5Vdc adapter or host equipment or 3.7Vdc from batteries. The antenna is PIFA antenna without antenna connectors.

The WLAN and Bluetooth antenna should not be considered to be able to transmit simultaneously as the device shared the same antenna and controlled by TDD method.

The other instruction, please have a look at the users manual.
