Subject: FCC ID: CJ6UPA3539WL

Dear Reviewer:

Please be advised that the Toshiba FCC ID: CJ6UPA3539WL, Model PA3539U-1MPC is a 802.11a/b/g mini- PCI express Radio manufactured by Intel Corporation for the global market as a client only device without radar detection and is identical to Toshiba FCC ID: CJ6UPA3538WL, Model PA3538U-1MPC 802.11a/b/g/n mini- PCI express Radio and falls under the same product family, but when labeled for marketing in North America (FCC ID: CJ6UPA3539WL), Model PA3539U-1MPC EEPROM will be flashed at the factory to disable 802.11n function and to only operate on these specific channels:

Channels 1-11, 2412-2462MHz 802.11b/g mode
Channels 36-64, 5180-5320MHz 802.11a mode
Channels 149-165, 5745-5825MHz 802.11a mode

This information when flashed into the EEPROM will not be accessible and can not be changed by the end user.

The will be calibrated to the following limits at the factory measured with a power meter and average power sensor:

Channels 1-11 at 15.5dBm, in 802.11b/g mode
Channels 36 -64, at 16.5 dBm, in 802.11a mode
Channels 149-165, at 17.5dBm, in 802.11a mode

The Toshiba FCC ID: CJ6UPA3539WL, Model PA3539U-1MPC will not pass functional tests and be shipped from factory if the conducted output power exceeds the limits listed above. The end user will not be given the capability to adjust output power to exceed the above listed limits.

If you have any questions please do not hesitate to contact us at 503-712-8076

Sincerely,

Marissa Faustino
