Confirmation Number: EA761891
Form 731 Filing of Class II Permissive Change

Gentlemen:

During the Form 731 online filing process (Class II Permissive Change), we were requested to list all prior specifications listed on the original grant.

The original grant indicated the following specifications:

Rules	Frequency Range	Output Watts	Frequency Tolerance	Emission
21,74	2150-2686	25		D7W

During this process, we were unable to select Part 21 from the given choices, as Part 21 was not listed as a valid selection. We were only able to select Part 74. Therefore, our Form 731 will only show Part 74 as a prior specification.

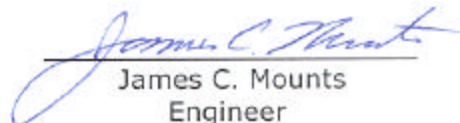

In addition, as a result of the Equipment Class Code on the original grant, "Licensed Broadcast Station Transmitter", we were not able to leave the Frequency Tolerance specification blank as was previously listed on the original grant.

This product is an amplifier and therefore has no frequency tolerance specification. As a result of this filing, we discovered that the original Equipment Class Code selected, "Licensed Broadcast Station Transmitter" (granted 3/30/98) is incorrect and should have been listed as "Amplifier".

We would request that the Equipment Class Code be changed from "Licensed Broadcast Station Transmitter" to "Amplifier" and that the Frequency Tolerance specification be listed as "AMP" or left blank as the original grant indicated.

Please contact me if you have any questions or if you need additional information. I can be reached by fax at (724) 873-8105 or phone at (724) 873-8100, extension 240.

Sincerely,

James C. Mounts
Engineer
