TURN YOUR PAPER ON

**-Letter of Attestation-**

**TO WHOM IT MAY CONCERN**

This letter is to identify to Intertek Testing Services NA and its associates the differences with the three models of the SKY WiFi Smartpen 2GB, 4GB and 8GB products. The soldered on Nand Flash memory in size(s) of 2GB, 4GB and 8GB are the only differences between the three models. Included with this explanation is a PDF copy of a product family BOMs that shows the three models and the Nand, Flash part relationship.

The BOM compare document has three columns where I highlighted the -002 BOM that represents the 2GB model, the -004 BOM that represents the 4GB model and the -008 BOM that represents the 8GB model.

**FYI - Main Board BOM's Rosetta Stone:**

- 026-00001-002 = 2GB model
- 026-00001-004 = 4GB model
- 026-00001-008 = 8GB model

Sincerely,  
Thomas L Davenport
