The above materials contain trade secrets and proprietary information not customarily released to the public. The public disclosure of these materials may be harmful to the applicant and provide unjustified benefits to its competitors. We would like to keep the internal photos and user manual confidential, because our product is installed on or around critical infrastructure as part of the security system and is not accessible to the general public. Radars are placed at the top of large poles and behind fences. The radar is only sold to companies that are under a Non-Disclosure Agreement (NDA) that restricts the disclosure of this information. Operation of the device is done by trained security personnel who SpotterRF or a license system integrator has trained through the user's manual, training videos, or in-person demonstrations and installations on how to optimize the setup and installation of the device for best use. Security personnel never have internal access to the radar and are required to accept the End User License Agreement (EULA) in order to operate the radar. The general public therefore does not have access to an internal view of our product and the user's manual. A copy of the NDA that is used and the EULA have been submitted with this document.

The applicant understands that pursuant to Section 0.457 of the Rules, disclosure of this application and all accompanying documentation will not be made before the date of the Grant for this application.

Pursuant to DA04-1705 June 15, 2004 of the Commission's public notice, we also request temporary confidential treatment of information accompanying this application as outlined below for 01 days (45, 90, 180 days, etc.):
