

Federal Communication Commission
7435 Oakland Mills Road
Columbia, MD 21046

Subject: Request for Confidentiality for FCC ID: CO6-CK-UNL

To Whom It May Concern:

Pursuant to the provisions of Sections 0.457 and 0.459 of the Commission's rules (47 CFR §§ 0.457, 0.459), we are requesting the Commission to withhold the following attachments as confidential document from public disclosure indefinitely.

Schematic Diagram
Block Diagram
Circuit Description
Internal Photographs
User's Manual

The above mentioned documents contain detailed system and equipment descriptions and are considered as proprietary information in operation of the equipment. The public disclosure of above documents might be harmful to our company and would give competitors an unfair advantage in the market. We would like to keep the internal photos and user manual confidential, because our product is installed on or around critical infrastructure as part of the security system and is not accessible to the general public. Radars are placed at the top of large poles and behind fences. The radar is only sold to companies that are under a Non-Disclosure Agreement (NDA) that restricts the disclosure of this information. Operation of the device is done by trained security personnel who SpotterRF or a license system integrator has trained through the user's manual, training videos, or in-person demonstrations and installations on how to optimize the setup and installation of the device for best use. Security personnel never have internal access to the radar and are required to accept the End User License Agreement (EULA) in order to operate the radar. The general public therefore does not have access to an internal view of our product and the user's manual. A copy of the NDA that is used and the EULA have been submitted with this document.

Additionally, we request short-term confidential treatment of information accompanying this application as outlined below:

External Photos
Test Set-up Photos

It is our understanding that all measurement test reports, FCC ID label format and correspondence during certification review process cannot be granted as confidential documents and that information will be available for public review once the grant of equipment authorization is issued.

Sincerely,

A handwritten signature in black ink, appearing to read "Logan Harris".

Logan Harris, CEO
