

Federal Communication Commission
7435 Oakland Mills Road
Columbia, MD 21046

Subject: Request for Confidentiality

FCC ID: CO6-M600C

To Whom It May Concern:

Pursuant to the provisions of Sections 0.457 and 0.459 of the Commission's rules (47 CFR §§ 0.457, 0.459), we are requesting the Commission to withhold the following attachments as confidential document from public disclosure indefinitely.

Schematic Diagram
Block Diagram
Parts List (BOM)
Theory of Operation
Tune-up Procedure
Antenna Specification and Description
Internal Photographs
User's Manual

Above mentioned documents contain detailed system and equipment descriptions and are considered as proprietary information in operation of the equipment. The public disclosure of above documents might be harmful to our company and would give competitors an unfair advantage in the market. Additionally, we would like to keep the internal photos and user manual confidential, because our product is installed on or around critical infrastructure as part of the security system and is not accessible to the general public. Operation of the device is done by trained security personnel who SpotterRF or a license system integrator has trained through the user's manual, training videos, or in-person demonstrations and installations on how to optimize the setup and installation of the device for best use. The general public therefore does not have access to an internal view of our product and the user's manual.

It is our understanding that all measurement test reports, FCC ID label format and correspondent during certification review process cannot be granted as confidential documents and that information will be available for public review once the grant of equipment authorization is issued.

Sincerely,

A handwritten signature in black ink, appearing to read "Logan Harris", written in a cursive style.

Logan Harris
CEO
SpotterRF
