Attention: Reviewing Engineering

Subject: FCC ID: COZMT4600NA, Class II Permissive Change

Enclosed please find FCC ID: COZMT4600NA certification application for Class II Permissive Change.

Class II PC is necessary to change existing GMRS-FRS (95A-95B) combination equipment intended for marketing after September 30, 2019 according to FCC KDB 888861.

3M LiteCom Headset was certified on October 17, 2013, has a maximum ERP of 0.1W in the 462MHz and 467MHz frequency bands, emission designator maximum necessary bandwidth of 7K10. Therefore, it should be qualified for a Class II PC to change Form 731 line-entries from 95A (GMRS) to 95B (FRS Subpart B of Part 95). BRS Channels available on the 3M PELTOR LiteCom models MT53HXX4600-NA will remain the same.

The device continues to meet all FCC emissions requirements and there is no impact to the radio performance data that is already on file with the FCC for this transmitter.

If you have any questions or comments, please do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Yuriy Litvinov".
