Request for a Modular Approval - FCC ID: CWTUGZZC

Dear Sirs,

Our client's module with the above FCC ID is seeking FCC authorization as a Modular transmitter. The requirements of the FCC Public notice DA00-1407 and KDB 996369 are met. Please see the following comments: Please contact us if you have any additional questions.

Item	Requirements	EUT
1	Have its own RF shielding	Device is equipped with metal shielding to cover RF section. Refer to external photos
2	Have buffered modulation/data inputs (if such inputs are provided),	The EUT has buffered data inputs.
3	Have its own power supply regulation	3.3 VDC. Refer to Block diagram
4	Meet the antenna requirements of Section 15.203	The antenna is an integral type and there is no antenna connector. Therefore, the modular transmitter does not regard to section 15.203.
5	Be tested in a stand-alone configuration, i.e., the antenna, AC or DC power and data input/output lines must be connected to the module but, the module must not be inside another case during testing	Device was tested in a stand-alone configuration on a Test Jig. Refer to setup photos & internal photos.
6	Be labelled with its own FCC ID number, and if the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module.	The module has its own label. Refer to FCC ID label format and location file.
7	The modular transmitter is manufactured so that the user cannot influence the operation of the transmitter that will operate outside of the scope of the regulations.	The module as manufactured is completely controlled by the onboard processor. There are no influences to the operation of the transmitter the end user can induce that will operate the module outside of scope of the regulations.
8	Compliance with RF exposure requirements is the responsibility of the grantee and will be addressed for all final host configurations	Compliance with RF exposure requirements
