Subject: R COLUMBIA'S FCC ID: D3ZSYS902-3

Dear Sharon,

Thank you for your request of schematics for the following RF modules that we supplied to R-Columbia:

RU0903B12KRA and RU0927H12KRA

Unfortunately, the products are around 8 years old and now obsolete. We cannot locate the schematics in our database.

The product was, however, used in many production cordless phones and other products by multiple customers over the years. These products passed regulatory agency approvals. It was not developed for specifically for R-Columbia.

I'm sorry I could not directly address your request. Please let me know if you have any additional questions.

Cordially,

Jeffrey Moy  
Business Development Manager  
Samsung Electro-Mechanics America
