

Modular Approval Letter

We Computime Limited wishes to request a modular transmitter approval.

Our Module

Product Name: ZigBee Module

Model Number: CT-EM2606; CT-EM260X

was deemed to fill the requirements of **PART 15 UNLICENSED MODULAR TRANSMITTER APPROVAL**.

1. The modular transmitter have its own RF shielding. We declare that the shielding of the module is identical to the sample tested on batch production.
2. The modular transmitter has buffered modulation/data inputs and the module comply with Part 15 requirements under conditions of excessive data rates or over-modulation.
3. The modular transmitter must have its own power supply regulation.
4. The modular transmitter must comply with the antenna requirements of Section 15.203 and 15.204(c). The antenna is permanently attached
5. The modular transmitter must be tested in a stand-alone configuration, and the module was not inside another device during testing. The module is capable of complying with Part 15 emission limits regardless of the device into which it is eventually installed. Unless the transmitter module will be battery powered, it must comply with the DC power lines and data input/output lines connected to the module do not contain ferrites. The length of these lines are more than 10 centimeters to make that there is no coupling between the case of the module and supporting equipment. Any accessories, peripherals, or support equipment connected to the module during testing are unmodified or commercially available
6. The modular transmitter was displayed a label with its own FCC ID number on the outside of the device. This exterior label was use wording such as the following: "Contains Transmitter Module FCC ID: DI2CT-EM2606". An example of which was included in the application for equipment authorization.
7. The modular transmitter complies with any specific rule or operating requirements applicable to the transmitter and we had provided adequate instructions along with the module to explain any such requirements. A copy of these instructions was included in the application for equipment authorization.
8. The modular transmitter must comply with any applicable RF exposure requirements.
