RE: FCC ID: DNHXC-001-XT_ATCB002040
Attention: Yukari Ito

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that the report (page 4) says 38.7dB peak and 87.4dB average. These numbers do not agree with the table limits in 15.245. Please recalculate and correct as necessary.
2. Please explain where you got the limit of 107dBuV/m for the 5262.500MHz spurious emissions listed on pages 12 and 13 of the report. This does not calculate to any of the specified values in the table or paragraphs in 15.245. Please explain and/or correct as necessary.
3. Please note that on pages 14 and 15 of the report you state the limit are 97.5dBuV/m and 77.5dBuV/m. However please note that 25mv is 87.9dBuV/m not 77.5dBuV/m. Thus the peak limit would be 107.9dBuV/m and the average would be 87.9dBuV/m Please explain your calculations for the frequencies in the emissions tables and please correct as necessary.
4. Please review your calculations for limits in the report and explain and/or correct as necessary.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
