Manufacturer declarations	<p><b>FCC 15.323 (c) (5):</b>          This device or group of co-operating devices located within 1 meter of each other shall not during any frame period occupy more than 6 MHz of aggregate bandwidth, or alternatively more than one third of the time and spectrum windows defined by the system.</p> <p>Manufacturer agrees:      <input checked="" type="checkbox"/> Yes      <input type="checkbox"/> No</p>																																							
	<p><b>FCC 15.323 (c) (12):</b>          This device shall not use the provisions of (c) (10) or (c) (11) to extend the range of spectrum occupied over space or time for the purpose of denying fair access to spectrum to other devices.</p> <p>Manufacturer agrees:      <input checked="" type="checkbox"/> Yes      <input type="checkbox"/> No</p>																																							
	<p><b>FCC 15.307 (b):</b>          The applicant is a participating member of UTAM, Inc. and will provide a related affidavit from UTAM, Inc. in course of certification.</p> <p>Confirmation by applicant:   <input checked="" type="checkbox"/> Yes      <input type="checkbox"/> No</p>																																							
	<p><b>FCC 15.319 (f) Automatic discontinuation of transmission:</b>          This device shall automatically discontinue transmission in case of either absence of information to transmit or operational failure. Automatic break off the transmissions means break off of connection and break of transmissions which are not control and signalling information or repetitive codes of complete frame or burst intervals. In case of devices using basics of DECT technology at least fixed parts and repeaters are using control and signalling information without direct connection to their remote station.</p>
