Subject: FCC Part 15 Class B approval of our
Windows-based Terminal model WT3200LE

Dear Ms. Elliott:

We would like to submit our new Windows-based Terminal model WT3200LE to obtain FCC part 15 class B approval under FCC ID DYDWT3200. The Radiated and Line Conductive measurements were performed in accordance with EN55022 Class B. The functionality of this model is similar to our approved model WT3320SE (DYDWT3320), except we have removed the serial and parallel ports and circuits. The logic board layout and chassis have been modified to accommodate these changes.

With this letter, I have provided all the necessary documentation electronically and attached the radiated and conducted setup drawings. All the test equipment information has been included as part of the radiated and conducted test report. Please note that the Anti-Drug letter was submitted to you during the original investigation of our model WT2300 (FCC ID DYDWT2300).

Equipment List for the Radiated Measurement test:

Support Equipment:

See Radiated Measurement data sheet

Test Equipment:

HP Receiver Model 84560A (RES BW: 30KHz-100KHz, VBW: 10KHz-30KHz)

Equipment List for the Conducted Measurement test:

Support Equipment:

HP PC Model: HP Brio PC (a copy of DOC is attached)

HP Printer (a copy of DOC is attached)

HP Monitor (FCC A3LCGC560)

Test Equipment:

HP Spectrum Analyzer Model 8566B (RES BW: 30 KHz-100KHz, VBW: 10KHz-30KHz)

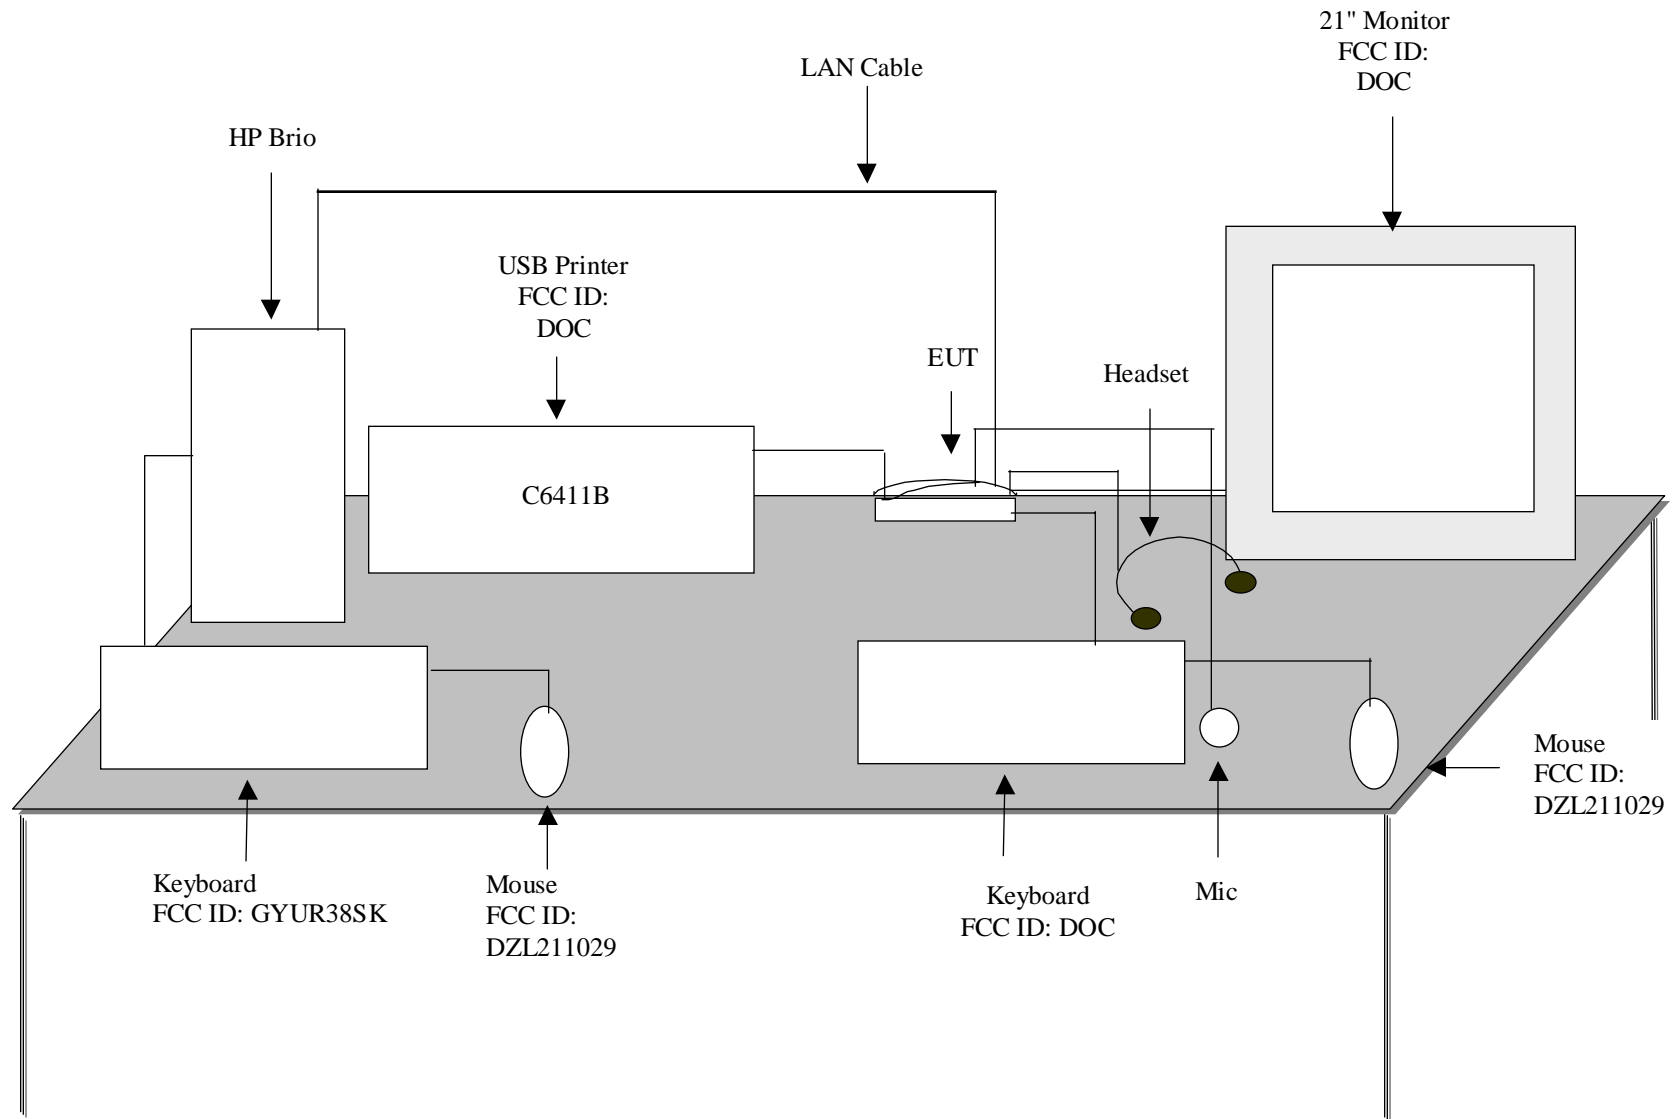

HP QP Adaptor Model 85650A

If you have any questions or need additional information, please contact me at 408.473.2697 (voice), 408.473.2245 (fax), or masood@wyse.com (email).

Sincerely Yours,

Masood Abrishamcar
Regulatory Engineering Manager
