

M-RU77 and C-UF15 : Product Description

Purpose:	M-RU77 and C-UF15 is a Cordless presentation device for personal computer. The system uses the 2.4 GHz ISM band and the Bluetooth technology. The transmitter implement a low power mode for batteries saving.
System:	This wireless presentation device (M-RU77) works with the C-UF15.
Radio transmission:	Bi-directional, Bluetooth technology.
Number of channels:	79
Carrier frequencies:	2402 MHz to 2480 MHz
Modulation:	Spread Sprectrum, Frequency Hoping
Data Rate:	721 kbit/s.
Transmission range:	10 m typical, free space.
Effective radiated power:	0 dBm (Bluetooth class 2).
Power Consumption:	500 mW typical when in movement.
Antenna:	Ceramic Monopole Antenna, integrated in the case.
