

Information For M-RK53

The mouse communicate with receiver using RF energy.

Operating carrier frequency is for Mouse device is 27.045 MHz

Band width of channel :7kHz (typical @ -20 dBc)

The data is FSK modulated.

Radiated effective power of the device is :200 nWatts

Type of Antenna: Inductive loop , integrated on printed circuit board.

Thanks in advance and with the best regards.

Bharat Shah

EMC/Agency Engineer
