RE: FCC ID: E5MDS-1710

Attention: Tri M. Luu

I have a few comments on this Application.

1. Please provide the factory 'tune up' procedures used to set maximum peak deviation.
2. The values in the emissions designator and the measured values in the data do not seem to correlate very well. Please explain.
3. The low power listed on the grant and the low power listed in the report are not the same. Please correct the 731 to show the maximum measured low power setting values. (20.84dBm or 121mW). Alternately please explain why the measured power is not what is listed on the 731 (the FCC requires TCBs to list the measured readings on grants).

A handwritten signature in black ink that reads "Dennis Ward".
