Application Examiner

Re: Request for confidentiality

Applicant: Orion Electronics Limited

FCC ID: EFCHT500

It is requested that the following items associated with this submission be held confidence in accordance with FCC Rule Section 0.459:

1. Schematics
2. Block diagram (or Technical Description)
3. Parts List
4. External photos
5. Internal photos
6. User guides
7. Tune-up procedure
8. Operational description

The reasons for withholding the above materials from inspection are trade secrets, substantial competitive harm, and public safety. The above exhibits contain designs and information proprietary to Orion Electronics Limited. This information is available only for internal company use and/or to qualified government personnel, and is not available publicly.

Public release of these items would allow competitors to copy key elements of Orion Electronics Limited's design, and also provide them with engineering specifications that have been based on Orion Electronics Limited's many years of experience. Moreover, the HT500 will be made available only to government personnel in the law enforcement and national security community. It is in the interest of the public safety to not release this information.

We feel that this material should be held confidential in perpetuity. The trade secrets that are based on Orion Electronics Limited's years of experience will always be applicable to the design of a similar product. The threat to public safety will likewise remain.

Sincerely,

A handwritten signature in black ink, appearing to read 'M. Morris'.
