## Overview

The IM11, FCC ID EHA-IM11, is an RFID module operating within the 902.75 - 927.25 MHz band as a frequency hopping spread spectrum transmitter. It is designed to read and write information to passive RFID tags. Limited modular approval is sought to require professional installation. The device meets all of the requirements for modular approval, but will be installed in Intermec RFID products only.

Confidentiality requested for allowed files. Request is properly addressed and referenced.

A letter listing the applicable modular requirements was submitted.

## Recommendation

All items have been resolved and completed to my satisfaction; therefore I recommend this application for approval.
