Hillsboro, OR 97124

June 26, 2006

Dear Application Examiner:

On behalf of Intermec Technologies Corporation, Northwest EMC Inc is submitting this application for a Class 2 Permissive Change of the 802.11(b)/(g) radio module, DRCB, FCC ID: EHADRBCB, to approve a new RF exposure condition. The DRCB was previously certified for limited modular approval in Intermec's 700C handheld computer. The DRCB has also been approved for co-location with two other radios in the 700C, FCC ID: EHAMC75 and FCC ID: EHABTS080.

Intermec is seeking authorization of the C2PC to permit the mobile co-location of the radio with several other previously certified radios. The 700C handheld computer can operate while docked in a variety of devices. The following radios will be co-located with the DRCB module when the 700C handheld computer is placed in their docking stations:

- Bluetooth radio, FCC ID: EHABTS080-1, in the handheld printer, M/N: 6820
- Bluetooth radio, FCC ID: EHABTS080-1, in the handheld printer, M/N: PW40
- RFID radio, FCC ID: EHARFID915PCC-6, in the handheld RFID grip, M/N: IP3
- RFID radio, FCC ID: EHAIM4, in the handheld RFID grip, M/N: IP4

All of these radios have been previously certified.

No changes have been made to the hardware or software of the DRCB in these co-located configurations. Co-located MPE estimates for mobile exposure conditions have been submitted. The exhibits submitted demonstrate compliance with FCC rules.

Your efforts in reviewing this application are greatly appreciated.

Best regards,

Northwest EMC, Inc.
