

NORTHWEST EMC, INC.

22975 NW Evergreen Parkway, Suite 400
Hillsboro, OR 97124

September 17, 2007

Dear Application Examiner:

On behalf of Intermec Technologies Corporation, Northwest EMC, Inc is submitting this application for the Class II Permissive Change of the DRCB radio module, FCC ID: EHADRCB. It is an 802.11(b)/(g) radio with limited modular approval in several of Intermec's devices. This C2PC will affect the use of the DRCB while installed in the CV30 forklift mounted computer while co-located with the Bluetooth BRM311 radio. There have been no changes to either radio since previously receiving limited modular approvals for the co-located configuration in the CV30.

The purpose of this C2PC application is to authorize the use of a new 3 dBi gain, external patch antenna. The RF Exposure exhibit contains MPE estimates for the new antenna and exposure condition.

The technical reports and exhibits include radiated test with the new antenna, as well as AC powerline conduction emissions. These reports demonstrate compliance with FCC rules 47 CFR 15.247 as a DTS device.

Your efforts in reviewing this application are greatly appreciated.

Best regards,

Northwest EMC, Inc.
