Agent	
Approval Type	Class II Permissive Change
Equipment Class	DTS Digital Transmission System
Rule Part	15.247

Overview

This application is for a new RF Exposure condition for Itermec's Model IP30 handheld RF ID scanner. The new RF exposure conditions occur when Intermec's 70 series mobile computers are docked in the cradle of the IP30, causing a new collocated condition. The 70 series computers contain radios as described in the cover letter.

No changes have been made to hardware or any of the radios in any of the devices described in this application. No testing was required and no changes to FCC ID's were necessary.

Recommendation

All items have been resolved and completed to my satisfaction; therefore I recommend this application for approval.
