FCC Laboratory
7435 Oakland Mills Rd.
Columbia, MD 21046

SUBJECT: Justification Letter

The product in this submission, the WWAN module and Antennas in FUJITSU Tablet Notebook / Model: T936 are electronically and mechanically identical to FUJITSU Tablet Notebook / Model: T935 that has been granted by FCC dated 11th November 2014.

The physical restraints introduced by this new host platform should have resulted in equal or lower level of SAR results. Therefore, the original WWAN SAR measurement report "FA491525-02_R01_FCC SAR_Fujitsu_TRAIL" has been referenced.

Only the WLAN module Intel 7265 is being replaced by Intel 8260, hence the multiband evaluation test results are submitted in report "M150814_FCC_EM7355_WWAN Report".
