Re: Removal of new frequency band 5500-5700 MHz (DFS) from FCC approval application.
Applicant: Fujitsu Limited
FCC ID: EJE-WB0039
731 CN: EA858770

Please be advised that our client, Fujitsu Limited (manufacturer) has decided to withdraw the supplied test results for the new frequency band 5500 – 5700 MHz (the band that currently needs DFS testing) from the application currently under review by the FCC.
The FCC ID for this application is EJE-WB0039, 731 Confirmation Number EA858770.

The removal of this frequency band 5500 – 5700 MHz for the EUT (Equipment Under Test) subjected in this application will be implemented by a software change by the manufacturer. The end-user will have no control over this frequency band selection. The hardware will remain exactly the same. This product is only a SLAVE device and has no capability to initiate a connection. The operational channels of the EUT will depend on the available MASTER devices (access points).

The withdrawal of this band will not affect the compliance in the other frequency band (5180 – 5320 MHz) presented to the FCC as part of this application.

The following files were revised (i.e. reference to band 5500-5700 MHz removed) and resubmitted to the FCC on 3rd May 2006, under FCC ID: EJE-WB0039 and Correspondence Reference Number 30813:

Test Report: M060246_Cert_AR5BXB6_NII_BT
Appendix I1: User Manual (part 1)
Appendix I2: User Manual (part 2)
Appendix J: Channel Bandwidth
Appendix K: Harmonics
Appendix L: Band Edge
Appendix M: Peak Power Spectral Density
Appendix N: Peak Excursion

The Form 731 completed when uploading this application includes the frequency band 5500-5700 MHz. Please remove this band from the Form 731.

A handwritten signature in black ink, appearing to read "C. Zombolas", is written over a horizontal line.
