Re: Usage of the RC1920 Repeater Technologies

The RC1920 repeater is to only be used as a fixed location repeater. The repeater will be operated in the same manner as a fixed cellular or PCS base station. It does not contain a self-contained antenna; therefore we believe it to be exempt from Part 24 EIRP and RF safety requirements. The antennas utilized with the repeater are determined by the end customer, and installed on free standing towers and are not supplied with the unit.

The repeater will be sold to licensed cellular phone operators and will be installed by trained personnel.

A handwritten signature in blue ink, appearing to read 'John Soliday', with a long, sweeping underline that extends to the right.
