EMERGENCY ALARM OVERRIDE

IMPORTANT: You will need to access your programming/valet button. It is built into your antenna or mounted in the dash. If you are unsure, contact your installer or Omega customer support. There is no way to disarm the alarm without this or a functioning remote.

STEPS
1. **Enter the vehicle**, the alarm will sound.
   TIME RESTRICTION: Perform the following steps within 10 seconds
2. **Turn the ignition ON** with the key (do not start the engine).
3. **Enter your override code** by tapping the programming/valet button.
   - The default code is 01. It can be set for 01-99 (see feature programming guide or use LINKR-MOBILE app - additional parts required).
   - If your override code is 11-99, each digit is entered in 2 steps of 1-9 presses.
   - Enter the 1st digit. If correct, the alarm will pause and the siren/horn will chirp once.
   - Enter the 2nd digit. If correct, the alarm will disarm.

REPLACING YOUR 1-WAY REMOTE BATTERY - SCAN THE QR CODE FOR DETAILS, RECOMMENDATIONS, & VIDEOS ➡

- Excalibur 1-way remote batteries typically last up to 2 years without needing replacement. This can vary greatly based on usage & battery quality.
- Note the remote part # and battery type listed on the back of your remote.
- Most remotes simply pop apart. Look for the notch near the keyring.
