

RF Exposure Evaluation Report

Equipment under Test : Transmitter

Model No. : 119

FCC ID : ELVNTZF

Applicant : Nutek Corporation

Address : No.167, Lane 235, Bauchiau Rd., Xindian District, New Taipei City

Date of Receipt : June 9, 2025

Date of Report : July 31, 2025

Prepared by

Central Research Technology Co.

EMC Test Laboratory

No.11, Lane41, Fushuen St., Jungshan Chiu, Taipei, Taiwan, 104, R.O.C.

Prepared By : Weitin Chen **Date** : July.31.2025
(Weitin Chen / Report Producer)

Approved By : Sam Chien **Date** : July.31.2025
(Sam Chien / Authorized Signatory)

This report shall not be reproduced, except in full, without written approval of Central Research Technology Co.. It may be duplicated completely in its entirety for legal use with the permission of the applicant. The test result in this report is based on the information provided by manufacturer and applies only to the sample tested.

1 Requirement for Compliance

According to KDB 447498 D04 v01:

FCC requirement:

Per § 1.1307(b)(3)(i)(A), a single RF source is exempt RF device (from the requirement to show data demonstrating compliance to RF exposure limits, as previously mentioned) if the available maximum time-averaged power is no more than 1 mW, regardless of separation distance. This exemption applies to all operating configurations and exposure conditions, for the frequency range 100 kHz to 100 GHz, regardless of fixed, mobile, or portable device exposure conditions. This is a standalone exemption, and it cannot be applied in conjunction with any other test exemption

2 Calcaulation

Frequency Range (MHz)	Maximum Power		Limit (mW)
	(dBm)	(mW)	
433.92	-11.47	0.071	1

$$P \text{ (dBm)} = E \text{ (dBuV/m)} - 95.2 = 83.73 - 95.2 = -11.47 \text{ dBm}$$

3 Result

According to result, the SAR testing for this device is not required.
