

Non-Conformities FCC ID: EO9100G (CKC CS Ref # E07-000083-FCC-01)

1 The date and original FCC grant and ID is not listed on form 731. Please complete item 11.

**Response: The read me first file stated that the original certificates were FC: E09100G dated 11/14/06 and IC: 864D-100G dated 11/14/06 on application E06-000230.**

2 The change description includes the statement ". The only thing that changed schematically was 2 capacitor values that match the antenna. The antenna had to be rematched, due to moving the electrolytic capacitor." However there is no measurement nor engineering calculation to indicate the ERP and spurious emission if any remains unchanged after the antenna is tuned. Please provide ERP measurement /or engineering calculation/assurance to show continued compliance.

**Response: A new test report has been put in the folder on the TCB drive.**
