Subject: Request for Class 2 Change
FCC ID:E09CCU100

Dear Sir/Madam:

Itron hereby requests a Class 2 Permissive Change for an Automatic Meter Reading device for reading of utility meters, FCC ID:E09CCU100. The change is to allow for transmitting slightly longer messages from the original certification increasing the Time of Occupancy (ToO) and decreasing the Duty Cycle Correction. With this increase in message length ToO and all radiated spurious will remain in compliance. There is also change to shift the top channel up with band edge measurements demonstrating compliance is maintained. All other parameters and the RF performance remains the same as before.

Sincerely,

A handwritten signature in black ink that reads "Jay R. Holcomb". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.

Jay R. Holcomb
