Subject: Request for certification  
FCC ID:E09CCU100A

Dear Sir/Madam:

Itron hereby requests a Class 2 Permissive Change for an Automatic Meter Reading device for reading of utility meters, FCC ID:E09CCU100A. The change is to allow for transmitting slightly longer messages from the original certification increasing the Time of Occupancy (ToO) and decreasing the Duty Cycle Correction. With this increase in message length ToO and all radiated spurious will remain in compliance. All over parameters and the RF performance remains the same as before.

Due to this family of what we call the 'A' models, (FCC ID:E09CU100A) having the same identical ISM radio, RF circuitry and operation as the 'B' family (FCC ID:E09CCU100B); and with the test reports for the 'B' family used for this identical change being less than one year old, we declare that the data presented in the provided reports represents compliance for FCC ID:E09CCU100A.

Sincerely,

A handwritten signature in black ink that reads "Jay R. Holcomb". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.
