To Whom It May Concern:

The User Manual for this product is provided in two parts.

The first part is a product-independent section that will apply to all Starkey hearing aids.

The second part is product-specific and contains applicable FCC ID, ISED IC, all ISED HVINs, and other wireless regulatory information.

A copy of the G Series AI RIC R product-specific information is attached to this letter.

Note that reference to this product-specific information is provided in the product-independent section of the User Manual and will be available online (as will the common information).

Should you have any questions, please feel free to contact the undersigned.

Sincerely,

A handwritten signature in black ink, appearing to read "William J. Mitchell".

# Wireless Parameters for Starkey Hearing Aids

## G Series AI Family

Starkey wireless hearing aids contain a radio transceiver utilizing Bluetooth Low Energy wireless technology operating in the 2.4-2.4835 GHz frequency band with a maximum effective radiated power listed in the following table using GFSK transmission modulation. The receiver section of the radio has a bandwidth of 1.5 MHz.

Hearing aids with NFMI checked in the following table also contain a radio transceiver utilizing Near Field Magnetic Induction operating on 10.281 MHz with maximum induced magnetic field strength of -5 dBuA/m at a measurement distance of 10 meters with 8-DPSK transmission modulation. The receiver section of the NFMI radio has a bandwidth of 400 kHz.

The EU Radio Equipment Directive Declaration of Conformity for each brand and style can be found at [docs.starkeyhearingtechnologies.com](http://docs.starkeyhearingtechnologies.com).

A gray cell means that the specified brand and style is not sold in the listed jurisdiction.
