

CPED Module integration

CPED FCC ID: EOA-CPED and IC: 6903ACPED

The Bluetooth radio in the CPED is provided by a Panasonic PAN1315 bluetooth module. This module has its own ID numbers - FCC ID: T7V1315 and IC: 216Q-1315.

The module has been integrated with a higher gain antenna in a product designed to be used as a portable device.

The antenna port measurements for the module contained in Eurofins report GOM21008-3623-P-15 are valid for the module installed in the CPED and additional Spurious Emissions measurements have been made and maximum antenna gain requirements considered.

The original ID numbers for the module (FCC ID: T7V1315 and IC: 216Q-1315) should be ignored as they are not relevant to the CPED which will be certified in its own right.
