Hi Chris and Claire,

Here are responses.

1. Please confirm that the label will be visible at the time of purchase in order to comply with the labeling requirements of FCC 2.925 (i.e. battery is installed by user before first use).

Answer #1:

A battery is installed by user before first use (see User manual page 5 "Getting Started", so the label is visible at the time of purchase.

2. Please provide the Schematic Diagram of the RF Module.

Answer #2:

See attached schematic diagram of the RF module.

3. Please confirm that the second antenna is just for receive diversity and not a second transmit antenna.

Answer #3:

Confirm the 2nd antenna is for receive diversity, it does not transmit signal from the 2nd antenna.

Regards,

Mika

Dear Claire & Thu,

You are listed as the Technical Contact for the above referenced TCB application. The following item(s) need(s) to be resolved before the review can be continued:

1. Please confirm that the label will be visible at the time of purchase in order to comply with the labeling requirements of FCC 2.925 (i.e. battery is installed by user before first use).
2. Please provide the Schematic Diagram of the RF Module.
3. Please confirm that the second antenna is just for receive diversity and not a second transmit antenna.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.

Best regards,

Chris Harvey
