Subject : Request for Class II Permissive Change
FCC ID : EW4DW092
Original gant date : 11/26/2012
Applicant : MITSUMI ELECTRIC CO., LTD.

To Whom It May Concern:

This is to request a Class II permissive change for FCC ID: EW4DW092, originally granted on 11/26/2012.

We granted full modular approval without SAR testing because its output power meets the exclusion limits stated in FCC Part 2 §2.1093 and FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65. However KDB 447498 was revised on October 24, 2012, its output power does not meets the exclusion limits stated in KDB 447498 1 D01 General RF Exposure Guidance v5. So we performed the SAR testing with host device, confirmed that this product still meets the minimum requirements of the applicable rules of FCC. Please refer to the test report submitted with this application.

Thank you for your attention to this matter.

Sincerely yours,

Masashi Tsuchida
MITSUMI ELECTRIC CO., LTD.
