IMPORTANT SAFETY INSTRUCTIONS

- The applied nameplate is located at the bottom of the baby unit's base. When using your equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury, including the following:
- Follow all warnings and instructions marked on the product.
 - Adult setup is required.
 - CAUTION:** Do not install the baby unit at a height above 6.5 feet (2 meters).
 - This product is intended as an aid. It is not a substitute for responsible and proper adult supervision and should not be used as such.
 - This product is not intended for use as a medical monitor.
 - Do not use this product near water, for example, near to a bath, sink, swimming pool or shower.
 - CAUTION:** Use only the internally, non-user replaceable battery fitted to the parent unit. There may be a risk of explosion if a wrong type of battery is used for the parent unit. The battery cannot be subjected to high or low extreme temperature and low air pressure at high altitude during use, storage or transportation. Disposal of battery in fire or a hot oven, mechanically crushing or cutting the battery can result in an explosion. Leaving the battery in an extremely high temperature surrounding environment can result in an explosion or the leakage of flammable liquid or gas. Battery subjected to extremely low air pressure may result in an explosion or the leakage of flammable liquid or gas. Dispose of used battery according to the information in the **RRBC seal**.
 - Use only the adapters included with this product. Incorrect adapter polarity or voltage can seriously damage the product.

- Never push objects of any kind into this product through the slots because they may touch dangerous voltage points or create a short circuit. Never spill liquid of any kind on the product.
 - To reduce the risk of electric shock, do not disassemble this product, but take it to an authorized service facility. Disassembling or removing parts of the product other than via the battery door (if applicable) may expose you to dangerous voltages or other risks. Incorrect reassembling can cause electric shock when the product is subsequently used.
 - You should test the sound reception every time you turn on the units or move one of the components.
 - Periodically examine all components for damage.
 - There is a very low risk of privacy loss when using certain electronic devices, such as baby monitors, cordless telephones, etc. **To protect your privacy, make sure the product has never been used before purchase, reset the baby monitor periodically by powering off and then powering on the units, and power off the baby monitor if you will not use it for some time.**
 - Children should be supervised to ensure that they do not play with the product.
 - The small parts of this monitor can be swallowed by babies or small children.
 - The product is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- SAVE THESE INSTRUCTIONS**
- Warnings**
- Use and store the product at a temperature between 32°F and 104°F.
 - Mishandling batteries can cause burn, fire or explosion hazards.
 - Do not expose the product to extreme cold, heat or direct sunlight. Do not put the product close to a heating source.
 - Warning—Strangulation Hazard—Children have STRANDED** in cords. Keep this cord out of the reach of children (more than 3 ft (0.9m) away). Do not remove warning label on the adapter cord.
 - Never place the camera unit(s) inside the baby's crib or playpen. Never cover the camera unit(s) or parent unit with anything such as a towel or a blanket.
 - Other electronic products may cause interference with your camera unit. Try installing your camera unit as far away from these electronic devices as possible: wireless routers, radios, cellular telephones, intercoms, room monitors, televisions, personal computers, kitchen appliances and cordless telephones.
- Precautions for users of implanted cardiac pacemakers**
Cardiac pacemakers (applies only to digital cordless devices): Wireless Technology Research, LLC (WTR), an independent research entity, led a multidisciplinary evaluation of the interference between portable wireless devices and implanted cardiac pacemakers. Supported by the U.S. Food and Drug Administration, WTR recommends to physicians that:
- Pacemaker patients**
- Should keep wireless devices at least six inches from the pacemaker.
 - Should NOT place wireless devices directly over the pacemaker, such as in a breast pocket, when it is turned ON.
- WTR's evaluation did not identify any risk to bystanders with pacemakers from other persons using wireless devices.
- Electromagnetic fields (EMF)**
This VTech product complies with all standards regarding electromagnetic fields (EMF), if handled properly and according to the instructions in this user's manual, the product is safe to be used based on scientific evidence available today.

CONNECT, CHARGE AND POWER ON THE BABY MONITOR

- Connect the Parent Unit and Baby Unit to the adapter and mains supply.
- Slide the switch to ON to power on the Baby Unit.

The Parent Unit turns on automatically after connection to the power socket.
- For optimum reception, raise the parent unit antenna.

NOTES

- Please peel off the lens/screen protector before use.
- Charge the parent unit battery before use.
- When powering up, the baby unit's orange status LED turns on. It will turn off after a while and remain off if the status LED is set to off.
- The status LED is set to off by default. You can turn it on using the app (Setting > Camera Setting > LED status).
- The baby unit may get warm during use. This is normal.

DOWNLOAD APP FOR MOBILE ACCESS

Use the **MyVTech Baby Plus** on your mobile device to monitor your baby remotely. Follow the instructions below to set up and pair your baby monitor with the app.

- Scan the QR code to download the free **MyVTech Baby Plus** mobile app, or search "MyVTech Baby Plus" on App Store or Google Play Store. If you have previously installed the app, ensure that you have the latest version.
- Tap to launch the mobile app on your device and create an account.
- We recommend that you use common webmail services, such as Google Gmail, to register your user account. Check your email (including the Spam folder) and activate your new account by entering the email verification code. Then, sign in to your account.
- Ensure that you are connected to a **2.4GHz Wi-Fi network** and have enabled **Bluetooth and Location Service** on your device.
- After signing in to the app, select **Camera(s) with Parent unit** and scan the QR code displayed on the parent unit. To find the QR code, press the **MENU/SELECT** button and go to > **Connect to Mobile App**.
- Input the Wi-Fi password.
- Press and hold** the pair key on the baby unit for 3 seconds until you hear the beep sound to enter pairing mode.
- Select the camera model that appears in the app and wait for the camera to connect. Once connected, it will display a live view preview.
- Select **"Continue"** and create a profile for your baby (Optional). Now you can start monitoring! (For models with 2 cameras, a pop-up will ask if you wish connect another camera. Repeat steps 7-9 for the second camera.)

TIP
Use **Camera Sharing** to instantly share access to the camera. Follow these steps:

- Go to **Menu** and select **Camera Sharing**.
- Choose **"Invite People"** and enter the name and email address of the family member's app account.
- The family member will receive a pop-up notification in the app and can accept the invitation to access the camera(s).

HOW THE SYSTEM WORKS

Tip To receive product firmware updates, this baby monitor requires connecting to a **2.4GHz home Wi-Fi network**.

Direct mode
Your baby monitor parent unit and baby unit connect to each other in **Direct mode** by default, which allows you to immediately stream video out of the box.

Wi-Fi mode
To enhance your experience and enjoy seamless live video streaming via your mobile app, and to receive product software updates (when available), we highly recommend setting up your monitor's Wi-Fi connection.

It uses your 2.4GHz home Wi-Fi network to connect your video monitor. It supports live video streaming through the mobile app.

To stream live video remotely with your mobile device, download and install the **MyVTech Baby Plus** mobile app. With the mobile app, your Wi-Fi router (not included) provides Internet connectivity to your HD video monitor system. It serves as a communicating channel between your baby unit and mobile device, allowing you to monitor and/or control your baby unit wherever you are. For more details, see **Download app for mobile access** section in this quick start guide.

OVERVIEW

Baby unit overview

- Light sensor
- Camera lens
- Infrared LEDs
 - Allow you to see clearly in a dark environment.
- Microphone
- Night Light
- Night Light Control Key**
 - Single Tap: Turn on/off.
 - Tap and hold (with the light turned on): Adjust night light brightness.
- LED indicator**
It is set to off by default. You can turn it on using the app (Setting > Camera Setting > LED status).
In direct mode:
 - Orange is steadily on when the baby unit is connecting to the parent unit.
 - Orange flashes slowly during video streaming.
 In Wi-Fi mode:
 - Green is steadily on when the baby unit is connected to Wi-Fi.
 - Green flashes slowly during video streaming to Wi-Fi.
- ON/OFF switch**
- Speaker**
- Temperature sensor**
- Power jack**
- Wall mount slots**
- PAIR**
 - To enter pairing mode, **press and hold** the **PAIR** key for three seconds until you hear a beep sound. Then follow the app instructions to connect the camera to a 2.4GHz Wi-Fi network.
 - To reset the baby unit, **press and hold** the **PAIR** key until you hear a beep sound. Release the **PAIR** key, and then press it key again five times until you hear another beep sound. The baby unit will emit another beep when the reset is complete. After that, the baby unit will reboot.

Parent unit overview

- LINK LED light**
 - On when the parent unit is linked to the baby unit.
 - Flashes when the link to the baby unit is lost.
- LED light**
 - On when the parent unit is connected to AC power, and the battery is charging.
 - Flashes when the parent unit battery is low and needs to be charged.
- 3-level sound indicator light**
The lights indicate different sound levels detected from the baby unit.
 - Green light: low sound level.
 - Green and amber lights: moderate sound level.
 - Green, amber, and red lights: high sound level.
- TALK**
 - Press and hold** to talk through the baby unit when displays on screen.
 - While in a sub-menu, press to exit.
- MENU | SELECT**
 - Press to enter the main menu.
 - While in a menu, press to choose an item, or save a setting.
- Arrow keys**
 - Press to navigate leftward, upward, rightward or downward, within the main menu and sub-menus.
 - Press to move the baby unit camera leftward, rightward, upward or downward.
- VOL - | VOL +**
 - Increase, decrease or mute the parent unit volume.
- Zoom**
 - Press to zoom in/out to different levels.
- Power | LCD ON/OFF**
 - Press and hold** to turn on/off the power.
 - Press to turn on/off the LCD screen.
- Microphone**
- Antenna**
- Speaker**
- Power jack**
- RESET**
 - Force reboot the parent unit.
- Stand**

PARENT UNIT ICONS

PROTECT YOUR PRIVACY AND ONLINE SECURITY

VTech cares about your privacy and peace of mind. That's why we've put together a list of industry-recommended best practices to help keep your wireless connection private and your devices protected when online. We recommend you carefully review and consider complying with the following tips.

Ensure your wireless connection is secure.

- Before installing a device, ensure your router's wireless signal is encrypted by selecting the "WPA2-PSK with AES" setting in your router's wireless security menu.

Change default settings.

- Change your wireless router's default wireless network name (SSID) to something unique.
- Change default passwords to unique, strong passwords. A strong password:
 - Is at least 10 characters long.
 - Is complex.
 - Does not contain dictionary words or personal information.
 - Contains a mix of uppercase letters, lowercase letters, special characters and numbers.

Keep your devices up to date.

- Download security patches from manufacturers as soon as they become available. This will ensure you always have the latest security updates.
- If the feature is available, enable automatic updates for future releases.

Disable Universal Plug and Play (UPnP) on your router.

- UPnP enabled on a router can limit the effectiveness of your firewall by allowing other network devices to open inbound ports without any intervention or approval from you. A virus or other malware program could use this function to compromise security for the entire network.

For more information on wireless connections and protecting your data, please review the following resources from industry experts:

- Federal Communications Commission: Wireless Connections and Bluetooth Security Tips – www.fcc.gov/consumers/guides/how-protect-yourself-online.
