### Purpose of Change

Dear Sir/Madam,

#### **FCC ID: EW780-5214-12**

There are some minor changes on 9127 based on previously certified 9113. Two openings were added on the shield can of the RF module at two dielectric filters. At the same time, the surrounding matching network has been adjusted for these changes.

The purpose of this change is to minimize the difference of dielectric filters' response from unit to unit and improve the audio quality.

In addition, the Caller ID function and headset jack have been added.

This change is not intended to change maximum transmit output power and/or field strength.

Except for the changes mentioned above, others remain unchanged.

Best Regards,

Wilson P.S. Cheung  
Senior Electronic Engineer
