Purpose of Change

Dear Sir/Madam:

Re: Application for permissive change of family models with FCC ID: EW780-6684-00

The purpose of this document is to describe all the changes on the VTech designed family models TL92XY8. The reason is to meet the new requirement of energy star.

Changes from the originally granted family models TL92XY8 to the permissive changed models TL92XY8:

- Change the base adaptor from linear to switching power supply (change adaptor input 117VAC to adaptor input 110-120VAC)
- Change the charger adaptor output from 200mA DC to 300mA AC.

Similarities between originally granted family models TL92XY8 and the permissive changed models TL92XY8:

- Same RF Module and circuitry in BS+HS;
- Same frequency band & channels

Sincerely,

Samson Man
