Subject: FW: Added Information for the BPA105 User

Importance: High

Hello Mike Kuo,
Please review this document below provided by Tektronix. Please advise about the concern that Charlie has.

Christine

Subject: Added Information for the BPA105 User

Christine, Chuck,

Attached is language used in many Tek products, identical to the material you provided us. As our manual for the BPA105 is already in print and can't be altered by the intended ship date, we propose to add the language to a single sheet that will be shipped with each unit. Please confirm that this is acceptable. The language will be added to the manual proper at the time of the first revision.

Thanks,

Charlie
