Hardware Installation
Step1: Insert 2 AAA batteries into the battery compartment with correct polarity.

Step2: Please refer to the +, - diagram inside the battery compartment.
Step3: Turn on your computer and plug the receiver into a USB port of your computer.
Step4: Your computer will detect this USB device automatically.
ID Setting
The product has been pre-set and the mouse and dongle receiver are already paired. It is not necessary to do the ID setting when you use the mouse for the first time. However, the connection may be lost due to RF interference of environment. Hence, it may be necessary to re-set the connection ID. Please follow the process below for the ID setting.
Step 1: Press the connect button on the receiver. The LED of receiver dongle connection will start to blink.

Step 2: Press the connect button on the back of Lynx-P2 within 8 secends.

Connect Button

Step 3: The LED on the receiver will blink faster for a while. This means that ID setting is completed.

Cautions
1. If the Wireless Mouse does not work properly, please go back to step 1.
2. Keep the batteries out of reach of children.
3. Do not mix different types of batteries; for example, carbon battery and alkaline battery.
4. Remove the batteries if the device will be not to use more than a month
5. The laser beam may cause injury of eye, please do not point to eyes directly.

TROUBLE SHOOTING

Symptom	Possible Reason	Remedy
The LED of receiver does not light or blink when the receiver is plugged into USB port of the computer	The computer is off or the USB port is without power supply	Turn on your computer or plug into a USB port with power supply
The mouse cursor on the screen does not move smoothly	Radio frequency is interfered or the distance is beyond RF transmitting range	Move the mouse closer to the mini receiver until the mouse cursor move smoothly.
