To Whom It May Concern:

The DSC NEO series of Wirefree Keypads operating at 912-919MHz are built using the same enclosure, hardware (RF circuitry and keypad controls) and have similar functionality. The only differences are related to the presence of proximity reader option and the voice prompts support:

HS2LCDWFPV9 – Wirefree Keypad with Alphanumeric LCD display, Proximity reader capability and voice prompts feature enabled

HS2LCDWFP9 – Wirefree Keypad with Alphanumeric LCD display, Proximity reader capability (voice prompt feature disabled)

HS2LCDWF9 – Wirefree Keypad with Alphanumeric LCD display (prox circuitry not populated, voice prompts feature not enabled)

The testing of model HS2LCDWFPV9 is representative for all models in this family.

Respectfully yours,

A handwritten signature in black ink, appearing to read "Dan Nita", is written over a light blue horizontal line.
