Re: FCC ID F9C26-0288

Applicant: Schlumberger Sema, Inc

Correspondence Reference Number: 23407

731 Confirmation Number: EA727109

1) Confirm that the only enclosures used will be the MCC and SR enclosures. <-----**We confirm that this is the case.** In addition the antenna will be permanently attached to these enclosures. How is the antenna made permanent? <-----**The antenna is mounted to the MCC or SR enclosure via its integrated threaded bulkhead mount connector which is secured inside the enclosure with a lock washer and nut, tightened with a wrench. The MCC and SR enclosures are pad-locked shut and/or are mounted 20 feet up from ground on a pole.**

2) For your information, the device is considered a mobile device not a fixed device with regard to RF safety purposes. Fixed devices are reserved for Cellular base stations or transmitter that are tower mounted or roof mounted.

Response: Thanks for the information.

Hopefully this answers all of your questions. Please contact me via doc@elliottlabs.com if you require more information.

Regards,
