RE: Schlumberger Resource Management
FCC ID: F9CCMM1402

I have the following comments on this Application.

- 1.) There is no advice in the installation manual with regard to reducing RF exposure. Please address and resubmit manual.
- 2.) Please provide copy of specification sheet for CellNet 01-1239 antenna described in installation instructions.
- 3.) FYI: Please be advised that RF Exposure information must always be broken out as a separate Exhibit. It cannot be left in the main body of test report.
- 4.) The RF Exposure information is confusing. What hardware is the above referenced FCC ID referring to?
- 5.) Gain of the antenna is not identified in RF Exposure evaluation.
- 6.) The RF Exposure evaluation has a lot of unique nomenclature specific to this system. A simpler plain English evaluation would be appreciated.
- 7.) Was equipment tested in three orthogonal planes?
- 8.) Agent Authorization letter?

Any questions please call or write to me direct. Remember to resubmit any additional information or comments through our website at <http://www.americanTCB.com>

Thanks,

William H. Graff

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
