Exhibit 11: RF Exposure/Environmental Evaluation

Demonstration of Compliance:

The GT-8310C is classified as a portable device, and it does not operate in the one of the services listed in § 2.1093(c). Therefore, the GT-8310C is categorically excluded from routine environmental evaluation for RF exposure as per § 2.1093(c).

The user's manual contains a warning statement to inform the user that the device complies with the RF exposure requirement.

Important Notice

Since this equipment has very low output power (EIRP <10 mW), it complies with the FCC RF Exposure Limit.
