

Test

Data

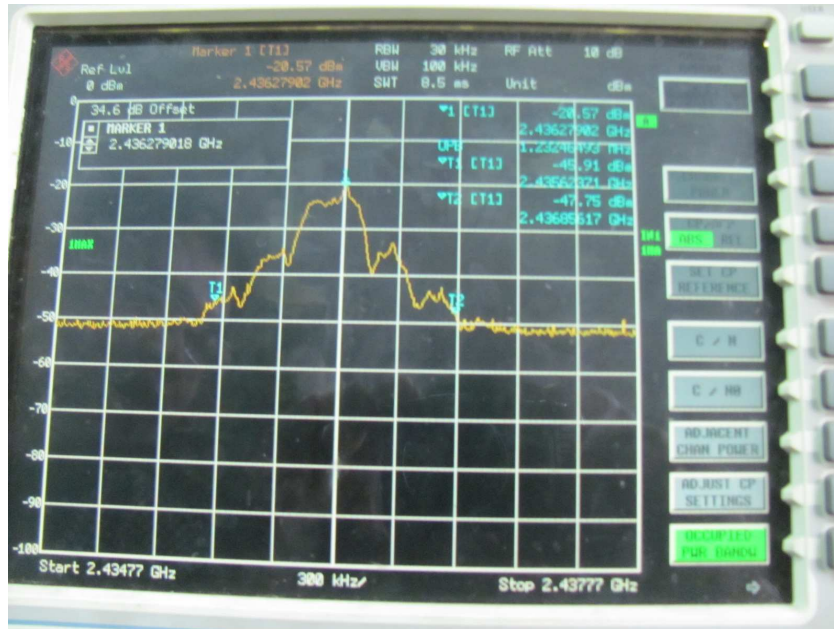

1. Radiated emission

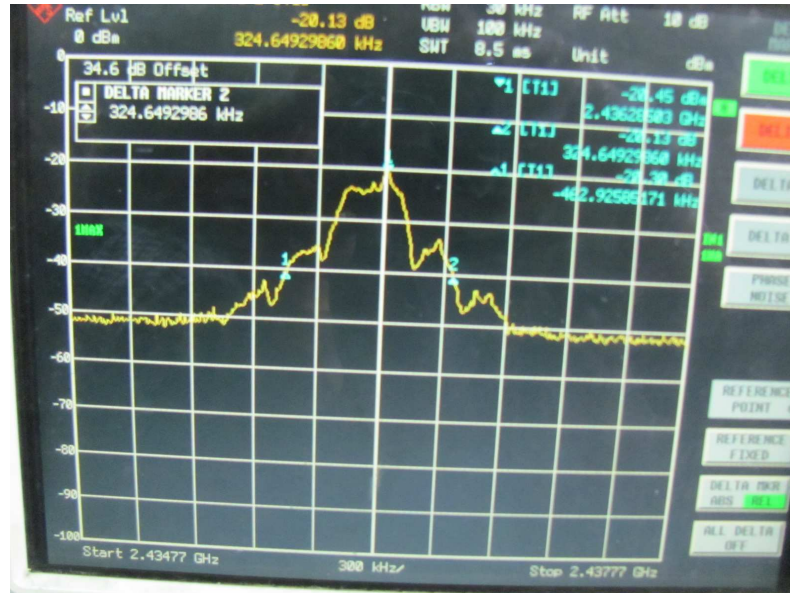

Vertical

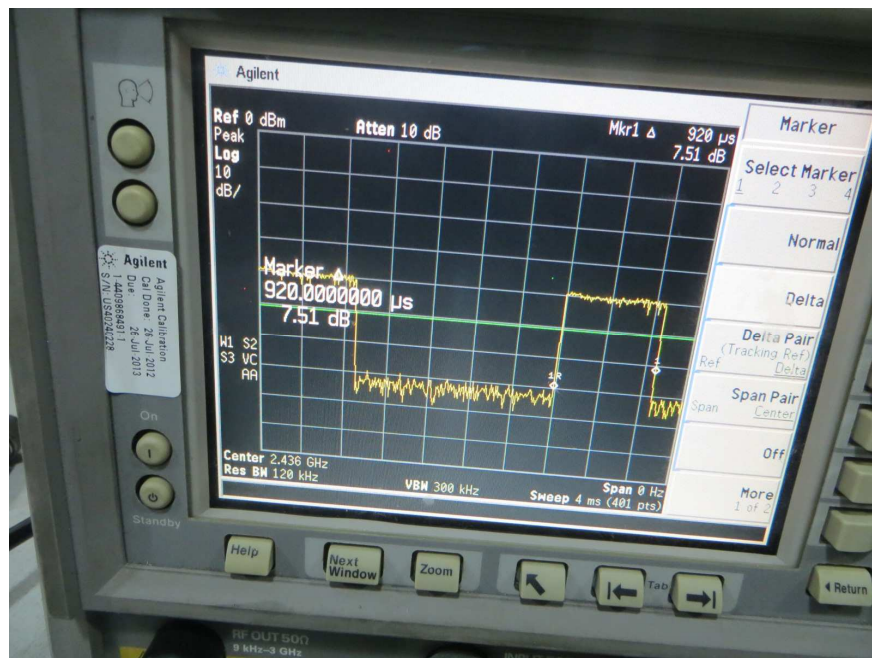

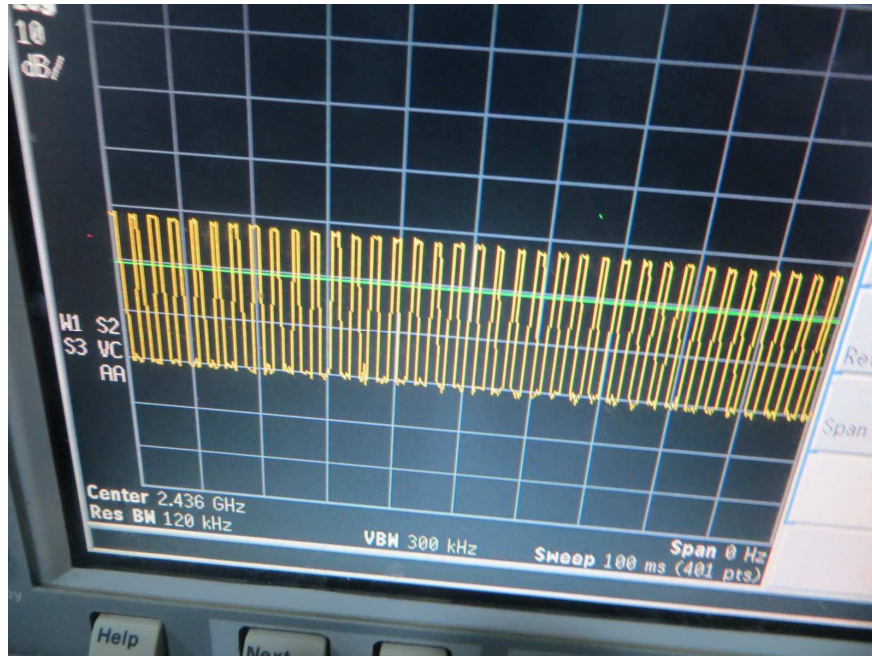

2. Occupied bandwidth

3. Assigned bandwidth (20dB bandwidth)

4. Duty cycle:

$$T_{\text{on time max}} = 0.92\text{ms} * 36 = 33.12 \text{ ms}$$

$$\text{PDCF} = 20\log (T_{\text{on time}}/100\text{ms}) = -9.60$$
