Re: FCC ID: G8630ERC85 (correspondence ID: 4790)

Q. Provide results for AC line conducted Measurements as per 15.207(a).

A. Please refer to the technical descriptions provided for the EUT. The EUT derives power from a DC powered controller, and thus the EUT and its controller do not connect to the AC mains.

Therefore, conducted emissions, as per FCC Rule 15.207(a), are not applicable.

Please see the Users manual and the test report for indications of how this EUT receives its power. The EUT is powered from a DC powered controller. There is no direct or indirect connection to AC power.

Q. Fee issues, We have submitted a new single check in the amount of \$1075 to Mellon Bank for processing. Please look out for this payment processing to happen any day now. I realize asking a banker to add 2 numbers is a little out of the question. I actually added the numbers for them, but.... Maybe I should scrutinize my bank statements a little more from now on.
