

NOTES:

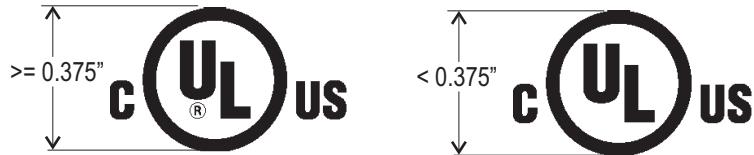

1) Print with permanent, smudge proof, black ink to be approved by Technicolor Engineering.

2) Serial Numbers. For definition of the Numeric Instrument Serial Number see Specification # 15692080.

Code 128 Barcode for Serial Number (14 digit).

The Pseudo Code (first 5 Characters of the serial number) is for tracking any instrument changes after the initial production configuration.

3) All labels which include the UL listing marking shall comply with UL requirements. Note UL logos with less than 0.375" Dia., must have the "R-ball" symbol (Registration Mark) removed.

4) For Factory FGR and Pilot runs where it is determined that the build will be unsalable. Replace Regulatory Marks and UPC codes with:

FGR SAMPLE
NOT FOR SALE.

or

PILOT SAMPLE
NOT FOR SALE.

When required, this will be communicated with a Factory Notice.

5) Unit Identifier - The Unit Identifier is a 10 digit decimal number that resides in the SoC of the unit. Each SoC will be programmed with a unique number. This number is used to identify the device by the system head end.

Unit Identifier: 12345 67890

The man readable Unit Identifier will have 5 digits, a blank space, and 5 digits. The barcode will not contain the blank space.

Safety Critical

This Label may require review by Product Certification and Compliance. See Specification, "Component Safety Requirements" 15092970 paragraph 5.
